Welcome message from the Co-Organising Chairman

It is an honour and a privilege to welcome all registrants to the 2nd FPMPAM Malaysian Healthcare Conference.

Our healthcare system is encountering multiple and complex challenges. They include, among others, demographic and disease pattern transition; increasing costs coupled with increasing demand for better outcomes; technological advances; inequitable distribution of human resources; catastrophic expenditure and insolvency; malnourishment in children; outbreaks of undiagnosed disease(s) among the Orang Asli and health indicators which lag behind those who were behind Malaysia before.

This conference provides an opportunity for stakeholders to share experiences and, hopefully, generate ideas for improvements that will facilitate universal health coverage.

Dr Milton Lurn Siew Wah
Organising Co-Chairman

Registration Form

Name:
Clinic Name / Institution:
Mailing Address:
Mobile No.:
E-mail No.:
Identity Card No. (For CPD points)

Please indicate, if Vegetarian Meal is required  Yes  No

Registration Fees

Category Subcategory Before 15 Aug 2019 After 15 Aug 2019 & Onsite
Medical practitioners FPMPAM member* 400.00 480.00
Medical practitioners Non-member 480.00 560.00
Others** 1 day 480.00 560.00
Others** 2 days 480.00 560.00

Message from the FPMPAM President & Organising Chairman

The Organising Committee and the Council of the Federation of Private Medical Practitioners’ Associations, Malaysia is pleased to present to you our innovative 3rd FPMPAM / IPH Annual Convention 2019, incorporating, the 2nd FPMPAM Malaysian Healthcare Conference.

The theme of this meeting “Hotspots in Outpatient medicine and Malaysian Healthcare Conference” has been carefully selected to provide a platform to discuss relevant issues common to the general medical and healthcare practitioners both in the private and public sectors. This programme covers important topics in clinical, medico-legal and social issues dealing with the business of outpatient medicine.

In the last six months, the current government has announced two private-public programmes namely PekaB40 and MySalam schemes seemingly to encourage the participation of the private general practitioners. The announcement came without much consultation with the private sector. The concern with these schemes is how it will be beneficial to both the private general practitioners and the B40 group as a whole. Thus, we have allocated a medical forum session to address the concerns on both schemes.

Similarly, we had another shock recently with the announcement by the Minister of Health that the Cabinet has already approved the ceiling price for drugs to be implemented by end of the year, also without much consultation with the private sector. The Federation had already issued a press statement cautioning that such price control in the private sector will be counter-productive in the long run. Even in socialist communist states, price control has been proven to be a failure. Regardless, doctors should be prepared to face the consequences of such government policy towards our practice and innovate our practice to survive the policy change.

As in previous years, a team of national and regional experts has been invited to share their knowledge and experiences with us on these important clinical and practice matters.

The Federation believes that as a medical professional organisation, besides being updated on the newest treatment and disease management, we have to be aware of the issues affecting the Malaysian healthcare landscape and engage with various market players and stakeholders in all possible ways for the benefits of the medical fraternity and patients.

We look forward to your participation in this CPD event.

Dr Steven KW Chow
FPMPAM President & Organising Chairman
Concurrent Scientific Programme
